

Key Insights

Price Impact Drove Growth — But Cost Escalation Absorbed Most of the Gain

Price Impact added +\$55M — but Cost Impact consumed -\$47M (85% absorption rate), limiting gross profit improvement to \$8M (\$5M → \$13M CY).

Recommendation: Run a product-level cost-to-serve analysis targeting the lowest-margin products to protect pricing gains from cost absorption.

Enterprise Is the Sole Loss-Generating Segment — Requiring Immediate Action

Enterprise is the only loss-making segment at -2.70% gross margin — a 75.92pp gap below Channel Partners (73.22%). The business is currently subsidizing this segment.

Recommendation: Suspend Enterprise discount approvals and conduct a pricing floor analysis. Escalate to leadership if break-even is not confirmed within two quarters.

Revenue Grew 148% on Pricing Alone — Volume Contributed Near-Zero

Net Sales grew from \$37.2M to \$92.3M, but Units Sold moved only +1.11% and Volume Impact was \$0M on the bridge. Growth was driven entirely by pricing — a commercially unsustainable position.

Recommendation: Prioritize volume growth in Germany, which trails market leader France by 28.79% in units (147.2K vs. 189.6K) — the most actionable gap in the portfolio.

COGS Growth Outpaced Revenue — Driving Structural Margin Compression

COGS grew +148.99% vs. Net Sales +148.16%, compressing Gross Profit Margin 28 basis points (14.38% → 14.10%). Cost Impact at -\$47M is the dominant profit headwind.

Recommendation: Prioritize the COGS decomposition and procurement review over discount remediation to isolate cost drivers — cost containment is the higher-impact action.

Channel Partners Represents the Optimal Margin Profile for Portfolio Scaling

Channel Partners delivered 73.22% consistent Gross Profit Margin across all six products (72.51%–73.80%), versus the 14.10% company average — a structural advantage underweighted in the commercial mix.

Recommendation: Reorient commercial growth toward Channel Partners; analyze PWN-Q7 (\$27.10M, top product) for penetration rate as the highest-ROI margin improvement lever.
